

Ecological Information

G 501 O Tens Azid

Water-dilutable cleaning agent

Ingredients: Preservation agents, alcohol, auxiliary agents.

Ecolabel	Percentage of readily biodegradable components according to OECD 301 or REGULATION on detergents	Theoretical oxygen demand	Phosphorus content (calculated as elemental phosphorus)
	99.9 %	57.1 mg / g	-

Most components of the product are non-toxic for aquatic organisms and at the same time subject to a fast and complete biodegradation, as well in waste water as after direct discharge into the environment during application.
