

Ecological Information

G 800 Rinax[®] Soft

Ready-to use hand-wash lotion

Ingredients: Aqua, Sodium Laureth Sulfate, Sodium Chloride, Cocoamide DEA, Glycerin, Sodium Sulfate, Parfum, Sodium Citrate, Methylisothiazolinone, Methylchlorisothiazolinone, C.I. 45100.

Ecolabel	Percentage of readily biodegradable components according to OECD 301 or REGULATION on detergents	Theoretical oxygen demand	Phosphorus content (calculated as elemental phosphorus)
	96.5 %	170 mg / g	-

Environmental impacts of the product are predominantly due to its content of surfactants, which are toxic to aquatic organisms. Together with most of the other organic components they are, however, largely degraded during the usual process time of sewage in treatment plants. Remnants eventually released into natural waters are immediately subject to further degradation processes and will soon disappear from the environment.

Non-readily biodegradable components consist practically exclusively of fragrances (etheric oils), which according to their function in nature are only slowly biodegraded.
