

Ecological Information

S 766 CORRIDOR® PUR CLEAN

Water-dilutable maintenance cleaner

Ingredients: <5% soap, <5% anionic surfactants, <5% nonionic surfactants, contains perfumes. Other ingredients: water-soluble solvents, alkalis, auxiliary agents, colouring.

Ecolabel	Percentage of readily biodegradable components according to OECD 301 or REGULATION on detergents	Theoretical oxygen demand	Phosphorus content (calculated as elemental phosphorus)
	96.2 %	230 mg / g	-

Environmental impacts of the product are predominantly due to its content of surfactants, which are toxic to aquatic organisms. They are, however, for the most part degraded during the usual process time of sewage in treatment plants. Remnants eventually released into natural waters are immediately subject to further degradation processes and will soon disappear from the environment.

The non-readily biodegradable components consist practically exclusively of fragrances (etheric oils), which according to their function in nature are only slowly biodegraded.
